The invention relates to a mutant pullulanase in which at least one methionine residue in the pullulanase is deleted or replaced by an optional amino acid residue other than Cys and Met and/or at least one alanine residue in the amino acid residues constituting pullulanase is deleted or replaced by an optional amino acid residue other than Ala. The mutant pullulanase is useful in bleach-containing detergents. The pullulanase is highly resistant to oxidisation.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       /note= "nucleotides encoding these residues are present in the coding sequence given in specification"

TITLE OF INVENTION: PULLULANASE, MICROORGANISMS WHICH
TITLE OF INVENTION: PRODUCE IT, PROCESSES FOR THE PREPARATION
TITLE OF INVENTION: PULLULANASE AND THE USES THEREOF
NUMBER OF SEQUENCES: 15
CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            921
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            445
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  398
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 637
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       577
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           517

Database

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Alpha-dextrin endo-1,6-alpha-glucosidase (EC 3.2.1
Alpha-dextrin endo-1,6-alpha-glucosidase (EC 3.2.1
N.Alternate names: pullulan 6-glucanohydrolase; pu
C;Species: Klebsicila pneumoniae
C;Date: 30-Jun-1988 #sequence_revision 30-Jun-1988
C;Accession: A26879; 802472
R;Katsuragi, N.; Takizawa, N.; Murooka, Y.
J. Bacteriol. 169, 2301-2306, 1987
A;Title: Entire nucleotide sequence of the pullulan
A;Reference number: A26879; MUID:87194626
A;Note: K. aerogenes
A;Accession: A26879
A;Molecule type: DNA
A;Residucs: 1-1096 <KAT>
A;Experimental source: strain W70

C;Accession: S51324
R;Kenz, A.; Schmid, R.; Kossmann, J.; Beck, E.
submitted to the EMBL Data Library, January 1995
A;Description: Sequence of a cDNA of the Spinacia oleracea L. starch debranching enzyme.
A;Reference number: S51324
A;Accession: S51324
A;Status: preliminary
A;Molecule type: mRNA
A;Residues: 1-964 <REN>
A;Cross-references: EMBL:X83969; NID:g634092; PID:g634093
